## WAREHOUSE MOTH TRAP

**sticky warehouse moth trap with insect sex pheromone  
for professional and household use**

**BIOSTOP® WAREHOUSE MOTH TRAP is monitoring the occurrence and eliminating slight infestation of the Indian meal moth (*Plodia interpunctella*), the cocoa moth (*Ephestia elutella*), the flour moth (*Ephestia kuehniella*) and the almond moth (*Ephestia cautella*) in flats, groceries, food stores and food factories, etc.**

**ACTIVE INGREDIENT:** sex pheromone

**ADVANTAGES:**

- Easily applicable.
- Environmentally safe.
- The trap contains no toxic insecticide.
- Very strong pheromone attractivity for moths.
- The glue remains effective for a long period.

**PHYSICAL AND CHEMICAL PROPERTIES:**

Appearance: trap: printed special cardboard covered with glue  
dispenser: rubber material containing of sex pheromone

Odour: odourless

Stability: stable up to 60 °C

Materials to avoid: wet conditions and materials

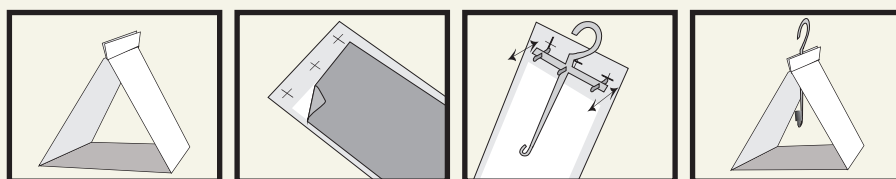

Hazardous decomposition: none

**GENERAL INFORMATION:**

As this trap does not contain any toxic insecticide, it is environmentally safe. The sex pheromone incorporated in the dispenser effectively attracts males of four moth species minimum for 6-8 weeks.

**DIRECTION OF USE:**

- Fold the cardboard sheet to form the shape of a triangle.
- Remove the protecting foil from the adhesive side of trap.
- Place the appropriate part of the hanger into the holes on the edge of the cardboard sheet, then fold the trap to create its final shape and fix it to the other side of the hanger.
- Take the dispenser out of the hermetically sealed foil pouch and place it on the hanger in the middle of the trap.
- Hang up the trap or place it on a shelf in the infested room.

Try to place the trap in a dust-free area. Check at regular intervals whether the trap is full of insects, has become contaminated or is functioning longer than two months. In such a case, replace the trap with a new one. After use the trap can be thrown into the trash. It is recommended to use at least one trap per 60 m<sup>3</sup> indoor space. In case of higher infestation, the source of infestation can be localised by simultaneous application of a few traps. In such case foodstuff infested with moth larvae should be destroyed.

**PACKAGING:** 2 traps - 2 dispensers - 2 plastic hangers /box, 16 boxes/carton  
In bulk: 180 pcs/carton
