

BioStop®

WASP AND FLY TRAP

BIOSTOP® wasp and fly trap catches wasps and flies due to the insecticide-free, extremely effective bait and food grade materials. The trap can be used in gardens, groceries, butcher's shops, baths and in any other place (outdoors) where wasps and flies can be a nuisance.

ACTIVE INGREDIENT:

Special food-type attractant

PHYSICAL PROPERTIES, APPEARANCE:

Plastic container with circle lid and with a cupric wire for hanging the trap

TOXICOLOGY:

As this trap does not contain any toxic insecticide, it is environmentally safe.

ADVANTAGES:

- Easy to use.
- It gathers the wasps and flies every day.
- Not dangerous for environment, contains no insecticide.
- Its special bait attracts the flies to the trap where they drown in the water.

USES:

It's easy to get rid of "unpleasant intruders". Wasp, flies can't resist the attractive liquid. They fly into the bottle and be drowned. Suitable for outdoor use. For better effect hang the trap under bright sunlight, away from windy areas.

PRODUCT FOR AMATEUR AND PROFESSIONAL USE

INSTRUCTION OF USE:

- Take off the cap of the trap in the box advancing along the black edge and put the plastic bottle on the table.
- Cut open the pouch containing the liquid with scissors, then pour the liquid into the plastic bottle.
- Add 2-3 dl water and mix.
- Restore the cap, then push hard by advancing round along the edge, so it fits well all the way. Do not lift the plastic bottle off the table while assembling.
- Using the copper wire in the box, hang up the assembled trap at places frequented by wasps and flies, such as branches of fruit-trees, beams, etc.
- To prevent solidification of the liquid, refill the evaporated water regularly.
- Carefully take apart the trap because there could be alive wasps.

Do not use the trap standing on the table, as it may easily fall over.

Depending on the weather, achieving full efficiency requires a few days.

Should the trap catch few insects, relocate it to another – preferably sunny – place.

When the trap is full, its content may be disposed of together with household waste water.

Refilled with BIOSTOP® wasp and fly trap refill liquid, the trap may be reused.

WARNING:

Keep away from food and out of reach of children. Wash hands in hot water and soap after work. Place the trap at a height where children and livestock cannot reach it. Disassemble cautiously as there may be live wasps inside the bottle. Do not use near apiary. Do not let children use the product.

STABILITY:

If stored in original closed packaging in a dry, cool and well ventilated place protected from radiant heat and light at max. 35 °C, it can be used for 2 years from manufacture.
